

THE X FACTOR

HUSTLER'S SLX BALEFEEDER RANGE

HUSTLER[®]

Rethinking the Everyday

SLX

FIVE REASONS TO CHOOSE A SLX BALEFEEDER

- 01: Easy to use.** Single level feed control makes it very easy to use and ideal for share milkers.
- 02: Toughest chain on the market.** Super strong 12,000 lb roller chain, with tough 40mm x 40mm zinc-plated bars. Bars are bolted to the chain, a stronger and more easily replaceable system.
- 03: Tough polyethylene floor.** Non corrosive, impervious to UV, slippery, easily repairable and very shock resistant. Fully enclosed - no wastage of expensive feed. Long bed can take 5' long bales.
- 04: Low maintenance.** Instead of bushes we use longer lasting block bearings, mounted outboard to keep them clean and free of damage.
- 05: Best bale security on the market.** The high rear bar means the bale cannot screw off the back on hills. Optional side rails are available.

“ Absolutely the best feeder i've ever used. Really easy to put on and off, safe on the hills, pretty close to the tractor and you don't lose any baleage while feeding out.”

WILLIE BERKERS, WAITOMO, NZ - SL360X

“ I find this a very good feeder for feeding in the troughs, it's very accurate to get it in there, no spillage.”

CHRIS JENNINGS, WEST COAST, NZ - SL450X

“ We purchased the SL700X because it ticked all the boxes! Some of the key advantages is the impressive ground clearance and the fact that the chassis is the lowest point not the feed bars. The loading system is brilliant using one Cylinder and some clever mechanical engineering makes it foolproof and safe and It comfortably handles our 800kg + bales”.

SHEEP, GOAT & DEER FARMER, CROMWELL, NZ - SL700X

HUSTLER'S HERITAGE >

From humble beginnings on a farm in Hawkes Bay, New Zealand in 1961, steady increase has led to the creation of a global company with exceptional foundations. Hustler builds uniquely engineered, world-class products which are formed from an innovative heritage of ingenuity and combined with a wealth of industry knowledge and experience.

Hustler Equipment was founded in Hawke's Bay

First sprayers built

First exports to Hawaii, Bermuda, Samoa, Fiji and Australia

INDUSTRY 1st
Patented self-steer sprayers introduced

INDUSTRY 1st
• Mast sideshift
• Patented high ground clearance
• Patented bintipper clamp

2 year warranty introduced

INDUSTRY 1st
Multi-lift™ non hydraulic forklift patented NZ and Australia

Front Runner™ front mounted minilift introduced

Load Floater™ suspension bin fork introduced

INDUSTRY 1st
Patented CHAINLESS 2000 bale feeder introduced

INDUSTRY 1st
Softarms™ developed for handling wrapped bales

INDUSTRY 1st
Equaliser introduced

INDUSTRY 1st
VMX™ forklifts launched

INDUSTRY 1st
Patented VS™ high visibility fork arm introduced

INDUSTRY 1st
Patented CHAINLESS 4000 self loading bale feeder introduced

INDUSTRY 1st
CHAINLESS 8000 multi-bale feeder

SL Range of chain type bale-feeders introduced

SLX bale feeders launched

Large capacity linkage sprayers introduced

Duraboom, NZ's toughest introduced

INDUSTRY 1st
SL-450T folding extension trough feeder introduced

Robertsons Manufacturing Acquisition - Comby Range

SL360X bale feeder launched

X5000 Series re-developed Chainless bale feeders introduced

Hurricane straw spreader attachment introduced

INDUSTRY 1st
Revolutionary Katipo sprayer range introduced

SL300X Balefeeder

Loaded with Hustler DNA, she's a real thoroughbred.

The all new SL300X is a no-nonsense bale feeder for farmers who want Hustler dependability without the bells and whistles, simply designed to do all the basics brilliantly.

Key Benefits

1 - VERSATILE INVESTMENT

3 point linkage and loader ready, utilising a new headstock design with bolt-on brackets, you get to choose if you want it mounted on the front or rear of a tractor or loader, and it can be offset to allow more tyre clearance when feeding into bunks or troughs.

2 - REDUCE HAY WASTE

Feed savings of more than 40% can be achieved with the SL300X. It lays down a fluffed-up windrow which stock can eat more easily. Feed out as much or as little as you need and save the rest for the next feeding time, this also keeps fodder fresher and more palatable, reducing selectivity between stock.

3 - SELF LOADING

The unique design developed by Hustler allows the feeding cradle to be disconnected without leaving the tractor seat, and the headstock slides out with its bale tynes to spike and load the bale onto the feeding cradle where the wrapping can be removed, reducing wasted fodder. The headstock reconnects which is made easy by unequal length tynes and is ready to distribute the bale.

4 - SAFE, SIMPLE, EASY

The hydraulically driven low speed mechanism quickly teases out bales, with plenty of power to feed out even the heaviest of bales. Easy to maintain with just 4 grease nipples and very few moving parts. The SL300X requires a 70+ horsepower tractor with just 1 hydraulic remote and allows the operator to lift, load and feed the bale, all from the comfort of the tractor seat.

DUAL SIDE FEED

A single lever control enables the SL300X to feed bales out to the left or right and gives precise control of the rate of feed.

LOW MAINTENANCE BEARINGS

The SL300X is equipped with our proven, greasable, self-aligning bearings with trash shields that easily outlasts any type of bush system.

BALE CHAMBER

Even the stickiest bales are not a problem for our new bale chamber. It is steeper and deeper for feeding out a bigger variety of bales and preventing roll out on steep terrain and a high security bar holds the bale securely in the chamber.

TOUGHEST CHAIN

Zinc-plated chains with heavy duty rollers and pins make our chain drive system almost twice as strong as others. The greater wear surface on each roller increases chain life because they can't stretch or snake. Fully enclosed chain and sprocket guides eliminate derailment.

ULTRA LOW CRADLE

Our ultra-low cradle design with removable fences makes for easy loading should you not have much lift height on your tractor's hitch. The longer spears also make loading easier, by reducing sag.

STRONGEST BARS

Our unique floor bars are 4-5 times stronger torsionally than other type of bars of the same size. We've bolted them to the chain which is stronger and for different bale types, blank bars or bars with more aggressive teeth are available and can simply be bolted on in a matter of minutes without breaking the chain.

TEETH

Our unique, extra strong shark teeth are designed to prevent feed being dragged under the feeder by releasing it at precisely the right moment. Teeth can be angled for more aggression, or the whole bar can be unbolted or removed without breaking the chain or using a grinder.

FLOOR

A fully enclosed floor design extends over the drive shafts, protecting them from wrapping, and eliminates wastage by preventing feed from falling out. Made from solid 5mm polyethylene, it is UV and shock resistant, and will not rust or corrode.

Its extra slipperiness reduces the amount of torque needed and makes it easier to turn bales that would otherwise grip to a steel surface.

SPECIFICATIONS

BALE SIZES ROUND: 4' x 4' - 6' x 5'

BALE SIZES SQUARE: Requires optional side bars

BALE WEIGHT: up to 1250kg (2760lbs)

UNIT WEIGHT: 480kg (1060lbs)

CAPACITY: 1 x bale

HYDRAULICS REQUIRED: 1 x double-acting, 30-60 l/min (8-16gal/min), 2250-3000 psi

Ease of Use.

Easy to load. Easy to feed. Easy to maintain.

You don't want hassle. That's why we've built our SL360X bale feeder so you can feed your cattle with just one tractor by yourself without breaking your back, or your bank.

LOAD.

Simply lower the unit to the ground, it automatically disengages the feeding cradle from the headstock and loading tyne. Spear the bale with the headstock and load it onto the feeding cradle, removing the wrapping. Reconnect the headstock with the feeding cradle by simply backing into it, which is made easy with the unequal length bale spears.

SELF-LOADING IS QUICK, SAFE AND EASY AND THERE'S NO NEED TO TUG ON A ROPE!

1. Lower feeder to the ground and drive away

2. Spear bale with tynes and position over feeder

3. Remove wrapping, and reconnect to feeder

FEED.

Simply pull the hydraulic lever on the tractor in the direction you want to feed, and adjust the speed of the floor to control how fast the bale unrolls. Adjust your travel speed to vary the size of the windrow. Feed only what you need and save the rest for next feeding, so it's fresher and more palatable.

MAINTAIN.

By using double sealed bearings that hold enough grease for a whole week of feeding out, just 4 grease nipples are all that needs maintaining for the lift of the feeder, no wearing parts or high maintenance bushes that will have you greasing the machine everyday. And our bisalloy sprockets and toughest floor chains on the market eliminate the need for continuous adjustments.

Versatility.

Versatility like none other!

The all new SL360X's compact design allows you feed in the tightest of passageways, and the versatility allows you to feed into bunks, troughs, over fences or into your cattle yards to save you needing to open gates, into mixing wagons to cut down diesel consumption and mixing time, and it will feed loose silage from a stack, dry hay, baled silage, fodder-beet and much, much more!

SL360X Balefeeder

The world's best single tractor, round bale feeding solution

The all new SL-360X is easier to use than any other type chain feeder on the market today. It is also the most innovative, with 6 unique features you won't find on any other bale feeder that makes it easier to use, more versatile, and saves you more of your precious time.

Key Benefits

1 - AUTO LATCH SYSTEM

The clever Snaplox auto connect/disconnect hands-free system saves you time, saves you having to tug on a rope to disconnect, and saves you from twisting your back. It's fail-safe, fast and operates naturally.

2 - VERSATILE INVESTMENT

Attach to a loader and feed into hay rings, troughs, TMR mixer wagons, or into your yards without needing to open the gate. We've made it double ended so you can connect at either end, with removable fences so the bale doesn't screw out the back on steep hills. Fit both removable fence options and feed out maize, loose silage or fodder-beet. Ideal when the pasture is a bit wet to take your wagon into the paddock.

3 - REDUCE HAY WASTE

Feed savings of more than 40% can be achieved with the SL360X. It lays down a fluffed-up windrow which stock can eat more easily. Feed out as much or as little as you need and save the rest for the next feeding time, this also keeps fodder fresher and more palatable, reducing selectivity between stock.

4 - SAVE TIME & ELIMINATE BACKBREAKING WORK

What would normally take more than 2 hours of grappling and back breaking work can be done in less than 30 minutes with a Hustler SL360X and fodder is distributed more uniformly providing cattle with equal opportunity of feeding. The SL360X can reduce fuel consumption and mixing time for diet mixer operators.

5 - SELF LOADING

The unique design developed by Hustler allows the feeding cradle to be disconnected without leaving the tractor seat, and the headstock slides out with its bale tynes to spike and load the bale onto the feeding cradle where the wrapping can be removed reducing wasted fodder. The headstock reconnects which is made easy by unequal length tynes and is ready to distribute the bale.

6 - SAFE, SIMPLE, EASY

The hydraulically driven low speed mechanism quickly teases out bales, with plenty of power to feed out even the heaviest of bales. Easy to maintain with just 4 grease nipples and very few moving parts. The SL360X requires a 70+ horsepower tractor with just 1 hydraulic remote and allows the operator to lift, load and feed the bale, all from the comfort of the tractor seat.

DUAL SIDE FEED

A single lever control enables the SL360X to feed bales out to the left or right and gives precise control of the rate of feed.

LOW MAINTENANCE BEARINGS

The SL360X is equipped with our proven, greasable, self-aligning bearings with trash shields that will easily outlast any type of bush system.

TOUGHEST CHAIN

Zinc-plated 12,000 lb chains with heavy duty rollers and pins make our chain drive system almost twice as strong as others. The greater wear surface on each roller increases chain life because they can't stretch or snake. Fully enclosed chain and sprocket guides eliminate derailment.

BALE CHAMBER

Even the stickiest bales are not a problem for our new bale chamber. It is steeper and deeper for feeding out a bigger variety of bales and preventing roll out on steep terrain. Increased front and rear bale chamber enclosure reduces feed falling out, and a high security bar holds the bale securely in the chamber.

AUTO LATCH SYSTEM

The clever Auto Latch system saves you the time and hassle of opening the tractor's back window and tugging a rope to unlatch the cradle. Uneven ground does not affect it as the feet will still push up enough to unlatch.

CONNECT EITHER END

To simplify loading and connecting, we've allowed you to connect or load from either end of the cradle. This also allows operators to switch the direction the bale is being unrolled without unloading the bale, which makes feeding tighter bales on both sides of the passage in single access barns much quicker and easier.

COVERED DRIVE SHAFTS

The covers ensure longer lasting bearings, and keeps mud and muck out of the bearings and eliminates feed wrapping around them, which means less maintenance and downtime.

TEETH

Our unique, extra strong 6mm shark teeth are designed to prevent feed being dragged under the feeder by releasing it at precisely the right moment. Teeth can be angled for more aggression, or the whole bar can be unbolted or removed without breaking the chain or using a grinder.

FLOOR

A fully enclosed floor design extends over the drive shafts, protecting them from wrapping, and eliminates wastage by preventing feed from falling out. Made from solid, 5mm polyethylene, it is UV and shock resistant, and will not rust or corrode.

Its extra slipperiness reduces the amount of torque needed and makes it easier to turn bales that would otherwise grip to a steel surface.

SPECIFICATIONS

BALE SIZES ROUND: 4' x 4' - 6' x 5'

BALE SIZES SQUARE: Requires optional side bars

BALE WEIGHT: up to 1250kg (2760lbs)

UNIT WEIGHT: 500kg (1100lbs)

CAPACITY: 1 x bale

HYDRAULICS REQUIRED: 1 x double-acting, 30-60 l/min (8-16gal/min), 2250-3000 psi

Loaded With Goodies.

Maximise Productivity. Minimise Frustrations.

It's no wonder more farmers choose Hustler bale feeders than any other brand, it's because we listen to farmers in more parts of the world than any other bale feeder manufacturer. This enables us to understand livestock farmers' needs better than anyone else, and we know you don't want frustrations, that's why we've incorporated more hassle-saving features into our bale feeders and tested them in more locations which allows us to stand behind our quality with a full 2 year warranty for peace of mind.

DUAL CONNECTION HOOKS

Connecting on both sides of the feeder proves a more positive connection, and the load is carried through the headstock rather than the bale spears.

UNEQUAL LENGTH TYNES

Makes reconnecting quick and easy for even the most inexperienced operators.

BOLT ON LOADER MOUNTS

Fit the SL360X to any type of loader or tractor on the market, and should you swap tractors it's not an engineering job to keep your feeder going.

TOUGHEST BARS ON THE MARKET

Our RHS feedbars have 4-5 times more torsional strength than competitors machines, an important factor when tearing heavy and wet bales apart.

CONNECT FROM EITHER END

To simplify loading and connecting, we've allowed you to connect or load from either end of the cradle. This also allows operators to switch the direction the bale is being unrolled without unloading the bale, which makes feeding tighter bales on both sides of the passage in single access barns much quicker and easier.

SIDESHIFT

The bolt-on lower hitch mounts allows for the feeder to be off-set by 180mm (7 inches) in either direction, another unique feature that allows operators to distribute the feed closer to the head-bails and stock in barns eliminating double handling of the feed, saving your time. The off-set feature works for both 3 point linkage and most loader mounts.

EASIER LOADING

With new hay tynes piercing bales without pushing them is a big advantage which makes withdrawing the tynes easier as well.

MORE VERSATILITY

Being loader mountable you can now realise substantial hay savings by splitting each bale into a number of hay rings, cutting waste. And the added visibility of being front mounted is a huge bonus.

REMOVABLE FENCES

The choice is yours! Operating on steep country and want the ultimate bale security? Add both front and rear fences. Or if you want the best loading, remove both fences. Have silage to feed out? Use both fences. The flexibility is yours.

OPTIONAL SIDEBARS

If you have badly mis-shapen bales, or want to feed out on the steepest terrain without loosing a bale, add a pair of side bars to your SL360X.

SL450X Balefeeder

The single bale trough feeder

With a fully adjustable hydraulic extension, the SL450X is ideal for feeding out into troughs, feed bunkers, over fences or onto feedpads. The extension raises for transport, making the unit narrow enough to easily fit through gateways and comply with road width regulations.

Key Benefits

1 - EASY TO USE

The single level feed control makes it very easy to use and ideal for share milkers.

2 - TOUGHEST CHAIN ON THE MARKET

Super strong 12,000 lb roller chain, with tough 40mm x 40mm galvanised bars. Bars are bolted to the chain, a stronger and more easily replaceable system.

3 - TOUGH POLYETHYLENE FLOOR

Non-corrosive, impervious to UV, slippery, easily repairable and very shock resistant. Fully enclosed - no wastage of expensive feed. Long bed can take 5' long bales.

4 - LOW MAINTENANCE

Instead of bushes we use longer lasting block bearings, mounted outboard to keep them clean and free of damage.

4 - BEST BALE SECURITY ON THE MARKET

The high rear bar means the bale cannot screw off the back on hills. Optional side rails are available.

ENCLOSED SPROCKETS

Our 6 tooth sprockets are made from Bisalloy (the same material a bulldozer blade is made from) so they last forever. With smaller diameter sprockets less torque is required to drive the chains, giving more drive power for tough bales. Designed so it is impossible for chain to jump off the sprocket saves you downtime in the field. The chain runs on a roller at the main elevator pivot, eliminating any further chain wear.

LOW MAINTENANCE BEARINGS

Protected double sealed heavy-duty 4-bolt bearings with trash shields are mounted outboard of the feeding chamber, which makes them last longer than internally mounted bushes.

SUPERIOR DUAL LOCK

Dual latch system for superior rigidity and safety with locking device.

MAXIMUM REACH

Large extension for maximum reach allows feeding out into hay baskets/cradles as well as troughs and feedpads.

POLYETHYLENE FLOOR

Fully enclosed extruded polyethylene floor reduces feed waste and it will never corrode. Being polyethylene it is slippery with 30% less drag compared to steel which makes feeding sticky silage or wet bales easy..

BALE CHAMBER

Fully enclosed front and rear bale chamber reduces feed falling out. This also enables you to feed out maize bales or fine chopped silage.

FULL WIDTH FEET

Wide feet provide extra stability when not in use and stops the feeder sinking into wet or muddy ground.

RAISED SIDES

The raised side stops feed falling off the elevator and being wasted. This is especially important when feeding out fine chopped silage or maize bales.

TOUGHEST CHAIN

Zinc plated chains rated to 12000lb each and with the heavy duty rollers and pins make our chain drive system almost twice as strong as our competitors. And the greater surface on each roller pin increases chain life because they can't stretch or snake.

STRONGEST BARS

Bars are 4-5 times stronger torsionally than angle type bars of same size. We've bolted them to the chain which is stronger and for different bale types blank bars or bars with more aggressive teeth are available and can simply be bolted on in a matter of minutes.

SPECIFICATIONS

BALE SIZES ROUND: 4' x 4' - 6' x 5'

BALE SIZES SQUARE: Requires optional side bars

BALE WEIGHT: up to 1000kg (2200lbs)

UNIT WEIGHT: 690kg (1520lbs)

CAPACITY: 1 x bale (round or square)

HYDRAULICS REQUIRED: 1 x double-acting, 30-60 l/min (8-16gal/min), 2250-3000 psi

GET MORE DONE EVERYDAY WITH A SL700X DOUBLE BALE FEEDER.

2017 MODEL UPGRADES:

COVERED DRIVE SHAFTS

Eliminate the possibility of long chop feeds wrapping or binding up on drive shafts.

TOUGHER LOADING SYSTEM

Stronger rear loading system design is built extremely tough to go the distance.

"It is very balanced on hill sides, great how it has a swivel eye and very manoeuvrable. Easy peasy to put on and take off, it's an awesome machine and I look forward to feeding out with it again soon!"

CECILIA SIMMONDS, REREWHAKAAITU, NEW ZEALAND - SL700X

"I wanted a good simple machine and it didn't take me long to make up my mind, the single post drawbar is excellent allowing tight turning, the shape of the bed works well and having the adjustable axle allows for great stability".

LINCOLN WRIGLEY, WEST COAST, NEW ZEALAND - SL700X

"The big advantage is its easiness to use, and self-loading. It's never broken down, side bars are very useful as you can see where it is when going through gates as well as keeping mis-shapen bales in the chamber on the steep country we operate on"

ANDREW GORDON, SCOTLAND - SL700X

"We purchased the SL700X because it ticked all the boxes! Some of the key advantages is the impressive ground clearance and the fact that the chassis is the lowest point not the feed bars."

SAM LEYSER, CROMWELL, NEW ZEALAND - SL700X

"We purchased our SL700X 3 years ago to feed 2000 bales each year and it has saved us 2 staff and it's now a part time job for one operator "

CRISTOPHER IBARRA, CHILE - SL700X

"I've owned Hustler bale feeders now for 10 years, this is my second machine, and I can't say enough good things about it, it's brilliant in the hills "

HUGH THOMPSON, HAWKES BAY, NEW ZEALAND - SL700X

SL700X Balefeeder

Trailed two bale feeder

Designed for medium to large operations feeding out thousands of bales each year, NEW FOR 2017 the SL700X has covered driveshafts to eliminate wrapping, and a stronger rear loading system design and is built extremely tough to go the distance.

Key Benefits

1 - EASY TO USE

The single level feed control makes it very easy to use and ideal for share milkers.

2 - TOUGHEST CHAIN ON THE MARKET

Super strong 12,000 lb roller chain, with tough 40mm x 40mm galvanised bars. Bars are bolted to the chain, a stronger and more easily replaceable system.

3 - TOUGH POLYETHYLENE FLOOR

Non-corrosive, impervious to UV, slippery, easily repairable and very shock resistant. Fully enclosed - no wastage of expensive feed. Long bed can take 5' long bales.

4 - LOW MAINTENANCE

Instead of bushes we use longer lasting block bearings, mounted outboard to keep them clean and free of damage.

4 - TOTAL CONTROL LOADING SYSTEM

Hustler's unique Total Control Loading (TCL2) system that has revolutionized bale handling since it was introduced eight years ago. With just one hydraulic cylinder to complete the entire loading operation, and a new gas strut to help reset the loader, the TCL2 is the fastest loading system out there. And with only one ram it's safer and less demanding on your tractor's hydraulics. Unlike other systems, the operator can reverse the bale if necessary, even once the bale is positioned low over the cradle for unwrapping.

BEARING COVERS

Removable bearing covers protect the bearings from mud and make cleaning and greasing easy.

OPTIONAL STRINGBOX

Our massive new stringbox keeps your wrap and string out of harms way and your tractor cab clean and smell-free. Big enough to hold fencing standards, knives and anything else you need on the job.

OPTIONAL SIDEBARS

Adding a set of sidebars quickly transforms the SLX to a capable square and round bale feeder.

TOWING EYE

The 12,000kg towing eye now has an easy-to-use height adjustment, enabling the SL700X to stay level behind virtually any tractor. Its ability to rotate 360° makes feeding out on steep terrain trouble-free.

OPTIONAL WHEELS

Optional traction tyres and wider 13/55-R17 flotation tyres are available.

OPTIONAL MUDGUARDS

For keeping the feed clean and dry in-transit.

GUARD PLATE

We've incorporated a guard plate underneath the SL700X, so there's nothing to tear or catch as you drive over electric fences and other obstacles.

DRAWBAR

Our single post drawbar design has set the benchmark in feeder manoeuvrability. By lowering the draw bar, we've made it easier (and less painful) stepping from side to side.

CHASSIS PROTECTS FEEDER

Our fully enclosed chassis prevents rust by stopping water getting in. We've built the SL700X with plenty of ground clearance to minimise bellying out. To avoid damage to chains and feed bars when it does touch the ground, we've made the underside of the chassis smooth, so it slides until the wheels gain traction again.

WEIGHT

Impressive strength to weight ratio has been achieved by constructing the SL700X from high tensile steel, which is 50% stronger than mild steel. At just 995kgs, it can be towed easily by smaller tractors. Bolted construction eliminates stress cracking common with some conventional bale feeders.

SPECIFICATIONS

BALE SIZES ROUND: 4' x 4' - 6' x 5'

BALE WEIGHT: up to 1000kg (2200lbs)

UNIT WEIGHT: 980kg (2160lbs)

CAPACITY: 2 x bales (round)

WHEELS: 10/75 R15.3

HYDRAULICS REQUIRED: 2 x double-acting, 30-60 l/min (8-16gal/min), 2250-3000 psi

Pictured with optional sidebars

Handle it

TOTAL CONTROL LOADING SERIES 2

01 Back tynes into bale

02 Bale is always under control

03 Remove net wrap

04 Tynes withdraw

05 Tynes ready to pick up 2nd bale

06 Bales in transport position

NEW 2017 STRONGER LOADING SYSTEM DESIGN

Faster cycle times, quieter operation, bigger bale handling capacity and a foolproof resetting operation are just some of the refinements we've made to Hustler's unique Total Control Loading (TCL) system that has revolutionized bale handling since it was introduced eight years ago.

With just one hydraulic cylinder to complete the entire loading operation, and a new gas strut to help reset the loader, the TCL Series 2 is the fastest loading system out there. And with only one ram to fill with oil, it's also less demanding on your tractor's hydraulics.

Our Total Control Loading System provides exactly what it says: total control. Unlike other systems, the operator can reverse the bale if necessary, even once the bale is positioned low over the cradle for unwrapping.

THE TOTAL CONTROL LOADING ADVANTAGE:

- Easy bale pickup means no digging up of paddocks or dirt mixing with feed
- Gentle and accurate placement of the bale in the bale chamber
- Easy to line up the bale
- Minimal feed wastage because the net wrap can be removed above the bale chamber
- Bale is secure during transport, even on steep inclines
- Handles round and square bales
- Second bale can be positioned low to the ground for added ballast.

HILL COUNTRY STABILITY

A lower centre of gravity and steeper feed cradle result in a 20% increase in stability, and means the SL700X is the most stable in it's class. This means greater safety and peace of mind when the going gets steep.

CHASSIS IS THE LOWEST POINT

Makes it possible to drive over hotwires without getting snagged, and protects the chain and feed bars from impact with the ground and obstacles.

NEW DRIVE

A beefed up drive system, including a newly designed coupling, provides unparalleled direct drive strength, while a bigger, motor allows you to feed even the heaviest and sloppiest bales with ease.

ADJUSTABLE WHEEL TRACK

Choose between the 3 axle width options (1.68m -1.92m) to suit your individual application.

MASSIVE AXLE

You need to feed out in all conditions, so we've fitted the strongest stub axle on the market. The SL700X is suited to the fastest tractors available today.

LOWER PROFILE TYRES

Lower profile tyres provide more stability and less bounce when travelling over rough terrain, which results less chance of rollover.

The Hustler Family

CHAINLESS BALEFEEDERS

The innovative, ultra-reliable Chainless® balefeeders without feed chains, will feed out almost any type of bale you have on hand.

Feeds out

- Any square and round bale
- Any bale type
- Frozen bales
- Teases hay apart maximising feed use
- Infinitely variable feed control

Chainless XR1500
 • Stationary rebaling feeder
 • 1 bale capacity
 • Up to 5 ft wide bales

Chainless X2500
 • 3pt mounted, self-loading
 • 1 bale capacity
 • Up to 5 ft wide bales

Chainless X5000
 • Trailed, self-loading
 • 2 bale capacity
 • Up to 5 ft wide bales
 • Total Control Loading

SL BALEFEEDERS

The SL range of feeders provide an economical option for farmers who primarily feed out round bales.

Feeds out

- Round bales of hay or silage
- Some square bales (with optional side bars)
- Easy to use single lever feed control
- Toughest chain and feedbars on the market

SL360X
 • 3pt mounted, self-loading
 • 1 bale capacity
 • Up to 5 ft wide bales
 • Snaplox auto connection system provide hands-free loading from either end.

SL450X
 • 3pt mounted, self-loading
 • 1 bale capacity
 • Up to 5 ft wide bales
 • Adjustable extension for feeding into troughs

SL700X
 • Trailed, self-loading
 • 2 bale capacity
 • Up to 5 ft wide bales
 • Total Control Loading

SOFTHANDS BALEHANDLERS

Hustler's full range of bale handlers offer a model to suit every farm size, built tough with a unique design.

Unique features include

- 3 position adjustable hands to suit any bale size (except CXR)
- Patented equaliser
- Slim hands for close stacking
- Wide range of loader mounts

System 10
 • Farmers Multi-tool
 • Round bales
 • 750kg capacity
 • Up to 500 bales/year

CXR Softhands
 • Farmers handler
 • Round bales
 • 1 tonne capacity
 • Up to 1000 bales/year

Compact Softhands
 • Farmers handler
 • Round and Square bales
 • 1 tonne capacity
 • Up to 1000 bales/year

Mega Softhands
 • Contractors handler
 • Round and Square bales
 • 2 tonne capacity
 • 100,000+ bales/year

Like all Hustler products, the X5000 is backed by our full Two Year Warranty. For an extra two years peace of mind, ask about the Hustler Gold Plus Extended Warranty at time of purchase.

SPRAYERS

Hustler's range of boom sprayers embody a raft of new features never seen before - all designed to make spraying safer, easier and more accurate.

Unique features include

- MixMax agitation system
- Unique low profile chassis/tank designs
- Unbeatable boom designs and durability
- Superior boom suspension technology
- Custom build option available

Katipo 680
 • Manual controls
 • 680 litre capacity
 • 6 metre manual fold boom

Katipo 890
 • Manual controls
 • 890 litre capacity
 • 8-12 metre manual fold booms
 • 50 metre folding hose reel and spray gun

Katipo 1150
 • Electric in-cab controls
 • 1150 litre capacity
 • 10-12 metre hydraulic folding booms

Fox 1500-1800
 • Electric - GPS controls

After sales support

Our dedication to you doesn't stop when you leave the dealer. That's because owning a Hustler should be as rewarding as the time it saves you. All Hustler built products are backed with a full 2 year warranty for added peace of mind in the field and include Hustler's legendary service, back up and support that exceeds your expectations. For an extra two years peace of mind, ask about the Hustler Gold Plus Extended Warranty at time of purchase.

Field Consultants

Hustler's trained Field Consultants are ready to help you. Providing sound advice, expert product knowledge training and on farm demonstrations.
