All riders pictured are professionals on a closed course. Polaris recommends that all riders take a training course. Do not attempt maneuvers beyond your capability. Always wear a helmet and other safety apparel. Never drink and ride. Polaris all-terrain vehicles depicted in this brochure feature Pure Polaris® parts and accessories and are not standard features of the base model vehicle they accompany. All performance and/or feature and benefit claims are based upon competitive data available at time of printing.

POLARIS®

SPECIFIC NEEDS, SPECIFIC OILS

Polaris® invests millions in engine development, and part of that investment is making sure its lubricants—critical to engine performance—are the right formula for your specific engine. The amount of testing data and engineering resources used in developing Polaris® lubricants would overwhelm an aftermarket company. Therefore, the aftermarket must spec an oil to an industry-wide standard that must account for a variety of operating parameters.

PS-4 is designed specifically for Polaris® 4-cycle engines and has high film strength and wear protection under extreme loads and temperatures. Exclusive anti-wear additives protect engine parts with extra rust and corrosion protection.

POLARIS® PS-4

Polaris® PS-4 oils exceed the latest industry protection standard as set by the API. Our proprietary additives clean and protect critical engine parts under high operating temperatures.

When tested against competitive oils, camshaft bearing races and lobes exhibit less wear when protected by Polaris® PS-4 oil.

WHY VISCOSITY MATTERS: Polaris® engines are designed to operate using oils rated at a specific viscosity. Viscosity is the measure of an oil's resistance to flow and shear and a way to gauge an oil's "film strength", which is a critical component in preserving engine life when an oil is subject to high heat or heavy loads.

ENGINEERED TO MAXIMIZE THE LIFE OF YOUR RIDE

All Polaris® fluids—from anti-freeze to brake fluid—are developed for your vehicle. Trust the only fluids perfectly engineered for your needs.

AGL

A proprietary blend of additives designed to optimize Polaris® ORV transmission life. Extreme pressure additives protect gears, drive chain and bearings from scoring and wear. Unlike typical gear case oils, AGL's unique viscosity range allows instant flow and film protection in extreme cold or high heat environments

- » .95 L • 2878068
- » 3.8 L • 2878069
- » 9.5 L • 2878070
- » 208 L • 2879594

Proper lubricant application and timing will ensure optimal vehicle performance. Please refer to your owner's manual for lubricant change interval schedules.

DOT 4 BRAKE FLUID

Polaris® DOT 4 Brake Fluid is a high-quality brake fluid designed for use in Polaris® hydraulic brakes. Superior high-temp characteristics plus anti-corrosive additives extend the life of brake system components and provide consistent, positive braking

POLARIS POWER®

POWERFUL, PORTABLE, DURABLE. These digital inverter generators are built to match your outdoor lifestyle, and are tested to the same rigorous standards as every Polaris® product. The 1000-watt generator is best for running a single device with low wattage requirements. The 2000-watt generator runs multiple devices with added surge protection and start-up wattage. The 3000-watt generator handles high-output needs and runs multiple devices. It also includes electric start for ease of use when needed.

WHICH GENERATOR FITS YOUR NEEDS?

- 1

START by adding up the running watts of everything you might power at the same time. (Use the chart on below)
- 2

NEXT, pick the device with the highest running watts, and add its starting watts to the previous total.
- 3

NOW you have the total amount of watts you need from your generator. Select a generator with a slightly higher wattage.

	Startup Wattage	Running Wattage
55" LCD TV	0	150
CROCK POT	0	200
RADIO	0	50-200
