When you research audio solutions, you'll see manufacturers bragging about how their audio equipment is "Marine Grade". Or worse yet, you'll discover they are repackaged components built for automotive applications. MB Quart, combined with Polaris, engineers Off-Road Grade Audio equipment that's proven to deliver the loudest, crispest sound in the harshest conditions. Rain, snow, mud, heat, cold, dust—**ANY PLACE YOUR RZR EXCELS, SO WILL YOUR AUDIO.**

PARTICLE SEPARATORS

MILITARY GRADE AIR FILTRATION

PARTICLE SEPARATOR

- Military Helicopters use Particle Separators to land in conditions with extreme dust like Afghanistan and Iraq. Without it, their filters would clog, which could result in a catastrophic situation
- S&B applied this same technology to UTVs, so that you can conquer extreme conditions while maintaining power and protecting your engine.

RZR 1000 TURBO '18-'21

HOW IT WORKS

STEP

1

Dirty air enters the Particle Separator's 19 vortex tubes.

STEP

2

The air is spun as it enters the vortex. Centrifugal force throws the dust against the outer sides of the tube where it exits through a rear slot. The clean air continues forward through the tube which is centered inside the vortex.

STEP

3

The clean air is directed to your stock air filter while the scavenge fan ejects the dust through the exhaust. The scavenge fan draws only 3.1 amps and is rated for 50,000 hours in harsh conditions including: water, dust and snow.
