**GSE**  E-BIKE RACK

# Having difficulty loading heavy bikes?

Our new E-Bike rack makes it simple. The GSE not only loads bikes by ramp, but it does it from the safety of the passenger (footpath) side of the car (that's both bikes) and then secures them regardless of frame size or shape. The GSE also tilts bikes out of the way for access into the rear boot or hatch, dismantles in seconds for easy storage and, like all GripSport racks, is covered by a lifetime warranty.
